

## **Research Assistant/Junior Scientist**

TeraCrystal ([www.teracrystal.com](http://www.teracrystal.com)) is a Contract Research Organization (CRO), providing services to the pharmaceutical industry.

TeraCrystal is looking for a Research Assistant/.Junior Scientist to expand the R&D team, to strengthen its focus on Pre-formulation studies. You will be a member of a research team dedicated to the Active Pharmaceutical Ingredients characterization.

### **The Position**

- You will be responsible for the execution of a broad set of experiments with a diversity of techniques and in a multidisciplinary fashion.
- You document and process the test results, draw conclusions and report these to the team.
- Pro-actively design follow-up and novel experiments.
- Develop new techniques and procedures.
- Grow in the role of becoming the pre-formulation focal point in all projects.

### **Profile**

The ideal candidate should have:

- A PhD/MSc or PhD candidate in Chemistry
- Strong lab and data collection skills
- Able to run several experiments in parallel and to work in a flexible way.
- Hands-on experience with analytical techniques, X-Ray Diffraction being an advantage.
- Team spirit, a high level of creativity and a result oriented way of working.
- Good interpersonal skills and able to work and stimulate a multidisciplinary team.
- Oral and written English skills.
