

# SYLLABUS

## 1. Information regarding the programme

1.1 Higher education institution	Babeş-Bolyai University, Cluj-Napoca
1.2 Faculty	Chemistry and Chemical Engineering
1.3 Department	Chemistry
1.4 Field of study	Chemistry
1.5 Study cycle	Master
1.6 Study programme / Qualification	Clinical Chemistry/ Master's Degree

## 2. Information regarding the discipline

2.1 Name of the discipline			Organic Compounds in Biological Systems – CME 6211				
2.2 Course coordinator			Assoc. Prof. Dr. Niculina Hădăde				
2.3 Seminar coordinator			Assoc. Prof. Dr. Niculina Hădăde				
2.4 Year of study	I	2.5 Semester	1	2.6. Type of evaluation	E	2.7 Type of discipline	Mandatory

## 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6 seminar/laboratory	14
Time allotment:					ore
Learning using manual, course support, bibliography, course notes					56
Additional documentation (in libraries, on electronic platforms, field documentation)					15
Preparation for seminars/labs, homework, papers, portfolios and essays					28
Tutorship					6
Evaluations					3
Other activities: not the case					-
3.7 Total individual study hours	108				
3.8 Total hours per semester	150				
3.9 Number of ECTS credits	6				

## 4. Prerequisites (if necessary)

4.1 curriculum	<ul style="list-style-type: none"> <li>Not the case</li> </ul>
4.2 competencies	<ul style="list-style-type: none"> <li>Not the case</li> </ul>

## 5. Conditions (if necessary)

5.1 for the course	<ul style="list-style-type: none"> <li>Students will attend the courses having the materials made available prior to each course</li> <li>Students will turn off their mobile phones</li> </ul>
5.2 for the seminar /lab activities	<ul style="list-style-type: none"> <li>Students will attend the seminar with the course notes referring to the seminar topic</li> <li>Students will turn off their mobile phones</li> </ul>

## 6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> <li>• Definition of notions, concepts, theories and advanced models in the field of clinical chemistry as well as their proper use within the professional community.</li> <li>• Application and interpretation of the properties of organic compounds as well as concepts, approaches and phenomena related to clinical chemistry</li> <li>• Identification and proper usage of concepts, method and theories for solving new complex problems of clinical chemistry.</li> <li>• Use of advanced knowledge in the field of chemistry and structural analysis to determine, explain and interpret the structure and the toxicity of bioorganic compounds</li> <li>• Critical analysis and usage of principles, methods and advanced work techniques to solve specific problems of clinical chemistry.</li> </ul>
Transversal competencies	<ul style="list-style-type: none"> <li>• Analysis , interpretation and communication of scientific information and comply with professional ethics and moral</li> <li>• Planning, monitoring and assuming professional duties of underline group. Proving the coordination capabilities, analytical thinking, adaptability and flexibility, team work abilities.</li> <li>• Self-evaluation of professional performances and establish the needs of continuous learning, documentation in the work fields in correlation to the labour market</li> </ul>

## 7. Objectives of the discipline (outcome of the acquired competencies)

7. General objective of the discipline	<ul style="list-style-type: none"> <li>• Familiarize students with the basics notions, concepts and techniques used in the identification, structural characterization and reactivity of majors organic compounds in biological systems and other biological relevant organic compounds by chemical and spectroscopic methods</li> </ul>
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> <li>• Developing the capacity of analysis and interpretation of chemical reactions that occur in biological systems.</li> <li>• Advanced knowledge on the chemistry of organic compounds in biological systems (bioorganic compounds, heterocycles and natural compounds), rational nomenclature, structural characterization, physical and spectral properties, methods of preparation, reactivity.</li> <li>• Application of the principle of organic structural analysis (NMR, MS, IR, UV VIS, Circular Dichroism, Fluorescence) for the investigation of bioorganic compounds; spectral determination of the structure of some relevant examples.</li> <li>• Familiarize students with the concepts mentioned above; explaining the chemical properties of the bioorganic and biological relevant compounds, use of the theoretical concepts in solving practical problems</li> </ul>

## 8. Content

8.1. Course	Teaching methods	Remarks
8.1.1. Structure of bioorganic compounds: Proteins, Nucleic Acids.	Presentation; Explanation, Conversation; Description; Debate	
8.1.2. Structure of bioorganic compounds: Carbohydrates, Lipid assemblies.	Presentation; Explanation, Conversation; Description; Debate	
8.1.3. Chemical synthesis of bioorganic compounds: Proteins, Nucleic Acids.	Presentation; Explanation, Conversation; Description; Debate	
8.1.4. Chemical synthesis of bioorganic compounds: Carbohydrates, Lipid assemblies.	Presentation; Explanation, Conversation; Description; Debate	
8.1.5. Biological synthesis of bioorganic compounds	Presentation; Explanation, Conversation; Description; Debate	
8.1.6. Biological synthesis of bioorganic compounds	Presentation; Explanation, Conversation; Description; Debate	
8.1.7. Electronic and vibrational spectroscopy in bioorganic chemistry: UV-Vis, Circular Dichroism.	Presentation; Explanation, Conversation; Description; Debate	
8.1.8. Electronic and vibrational spectroscopy in bioorganic chemistry: IR and Raman	Presentation; Explanation, Conversation; Description; Debate	
8.1.9. Electronic and vibrational spectroscopy in bioorganic chemistry: Fluorescence Spectroscopy.	Presentation; Explanation, Conversation; Description; Debate	
8.1.10. Magnetic resonance spectroscopy for study of biomolecules	Presentation; Explanation, Conversation; Description; Debate	
8.1.11. Mass spectrometry (MS) and Proteomics	Presentation; Explanation, Conversation; Description; Debate	
8.1.12. Separation and isolation methods of bioorganic compounds	Presentation; Explanation, Conversation; Description; Debate	
8.1.13. Chemical modification of biomolecules. Study of the molecular interactions using high throughput techniques	Presentation; Explanation, Conversation; Description; Debate	
8.1.14. Molecular recognition and affinity	Presentation; Explanation, Conversation; Description; Debate	
<b>Bibliography</b> 1. A. Miller and J. Tanner Essentials of Chemical Biology - Structure and Dynamics of Biological Macromolecules, JohnWiley & Sons Ltd, 2005 2. D. Van Vranken and G. Weiss Introduction to Bioorganic Chemistry and Chemical Biology, Garland Science, Taylor & Francis Group, 2013 3. L. David, C. Cristea, O. Cozar, L. Găină, Identificarea structurii moleculare prin metode spectroscopice, Editura Presa Universitară Clujeană, 2004. 4. C. Cristea, I. Hopartean, I. A. Silberg, Chimia Organica a Produsilor Naturali, ed. Risoprint, 2002.		
8.2 Seminar / Laboratory	Teaching methods	Remarks

8.2.1. Safety rules. Presentation of the laboratory objectives, bibliography and worksheet.	Conversation, Learning by discovery, Problem solving.	
8.2.2. DNA extraction/Isolation from tomatoes.	Experiments, Conversation, Learning by discovery, Problem solving	
8.2.3. DNA hydrolysis.	Experiments, Conversation, Learning by discovery, Problem solving	
8.2.4. Adenine synthesis in prebiotic conditions.	Experiments, Conversation, Learning by discovery, Problem solving	
8.2.5. Lactose isolation from milk.	Experiments, Conversation, Learning by discovery, Problem solving	
8.2.6. Structure determination and identification of bioorganic compounds by various spectroscopic methods	Conversation, Learning by discovery, Problem solving	
8.2.7. Structure determination and identification of bioorganic compounds by various spectroscopic methods	Experiments, Conversation, Learning by discovery, Problem solving	
Bibliography		
1. S. Mager, „Analiza Structurala Organică”, Editura Stiintifica si Enciclopedica, Bucuresti 1979.		
2. R. M. Silverstein, F. X. Webster, D. J. Kiemle “Spectrometric Identification of Organic Compounds”, Wiley, New-York, 2005.		
3. Anumukonda, L. N.; Young, A.; Lynn, D. G.; Buckley, R.; Warrayat, A.; Graves, C. L.; Bean, H. D.; Hud N. V. <i>J. Chem. Educ.</i> <b>2011</b> , 88, 1698–1701;		
4. 5. Charles Dickson <i>Experiments in Pharmaceutical Chemistry</i> - second edition, CRC Press, 2014, pg. 6.		

## 9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- Acquirement of the theoretical and practical concepts of **Organic Compounds in Biological Systems** course will provide the students with the competencies requested by possible employment sectors stetted by RNCIS.

## 10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the final grade (%)
10.4 Curs	Correctness of answers – proper understanding and learning of notions and concepts discussed during lectures; Correct use of learned concept within new contexts.	Written examination. Proven or intended fraud is punished according to the ECST rules of UBB.	70%
	Correct solving of the problems as part of the examination subjects		
10.5 Seminar/laborator	Correctness of answers – proper understanding and learning of notions and	Continuous assessment (session 6 and 7). Evaluated by means of problems to be	30%

	concepts discussed during lectures; Correct use of learned concept within new contexts.	solved,	
	Preparation of the worksheets (experimental procedure, identification of the products)	Laboratory report - delivered at the end of each session	
	Performing correct and safely experiments	Activity in the laboratory	
10.6 Minimum performance standards			
<ul style="list-style-type: none"><li>• Grade 5 (five) at the written exam, participation to the final written exam is conditioned by participation to all laboratory classes and minimum grade 5 (five) for the lab work.</li><li>• Adequate knowledge and usage of basic concepts used in the characterization and reactivity of bioorganic compounds</li></ul>
