

COURSE SYLLABUS

1. Information about the study program

1.1 University	Babeş-Bolyai University
1.2 Faculty	The Faculty of Letters
1.3 Department	The Department of Foreign Languages for Specific Purposes
1.4 Field of study	Language and Literature
1.5 Study cycle (BA/MA)	BA
1.6 Study program/Qualification	BA

2. Information about the subject

2.1 Course title/Code	English for specific purposes - Practical course/ Code LLU0011							
2.2 Course tutor								
2.3 Seminar tutor	Lecturer Lazar Adriana, PhD							
2.4 Year of study	I	2.5 Semester	1	2.6 Type of assessment	E	2.7 Course status	Contents	DC
							Mandatory	DO

3. Total estimated time (teaching hours per semester)

3.1 Number of hours per week	2	of which: 3.2 course	0	3.3 seminar/laboratory	2
3.4 Total number of hours in the curriculum	28	of which: 3.5 course	0	3.6 seminar/laboratory	28
Time distribution					Hours
Study based on textbook/course manual/recommended reading/personal notes					10
Additional research in the library, by accessing scientific databases, or during field work					10
Preparation for seminars/laboratory classes, essays, portfolios and reports					10
Tutoring					6
Assessment (examinations)					6
Other activities					
3.7 Total hours for individual study	42				
3.8 Total hours per semester	70				
3.9 Number of credits	3				

4. Prerequisites (if necessary)

4.1 Curriculum	
4.2 Skills	● Minimum level B1 according to the Common European Framework of Reference

5. Conditions (if necessary)

5.1. For delivering lectures	
5.2. For teaching seminars/laboratory classes	Multimedia laboratory, photocopies, electronic format materials, video projector

6. Acquired specific competences

Professional competences	<p>C1 1 Identifying and understanding the sociocultural contexts and roles, the verbal and written communication conventions specific to the foreign language, in terms of reception (reading/listening), production (written/oral) and linguistic strategies.</p> <p>C1 2 Identifying and understanding the contexts and roles, as well as the concepts, methods and the discourse/language that are specific to the different professional communication contexts within the academic environment, focusing on the rhetorical situation, written and oral communication, the stages of the writing process, academic writing production from within the field of social sciences/exact sciences/humanities, professional deontology and identifying plagiarism.</p> <p>C2 1 Interpreting the relation between an oral or written message and the context it belongs to, identifying argumentative and construction techniques of the scientific message in the foreign language, especially within the academic and the professional communication contexts.</p> <p>C2 2 Making use of basic knowledge to explain and interpret the various written communication methods in the field of social sciences/exact sciences/humanities (textbooks, specialized literature, scientific communications, research reports, forewords and introductions to specialized literature books, reviews of specialized literature books – written and electronic support), of the conventions writing these texts imply, as well as identifying plagiarism.</p> <p>C3 1 The transfer of acquired concepts/principles/methods in guided activities for written text reception (critical reading) and for production (writing) focusing on the stages of the writing process (planning, draft writing, reviewing and producing a final draft), presenting and developing text related ideas as well as textual structure (global and local), developing strategies to expand specialized vocabulary, efficient verbal communication (style of communication), building argumentation to the standards specific for the foreign language studied in the academic environment, making use of techniques to avoid plagiarism (using quotes, summarizing, paraphrasing).</p> <p>C4 1 Organizing debates, carrying out individual and group projects on topics from within the field of study.</p> <p>C4 2 Critical reception and production of verbal or written messages, specific to scientific communication at university level (project presentations, reports, reviews, communications, dissertations etc.) in the foreign language. Using information sources with discernment and scientific probity.</p> <p>C4 3 Using the standard criteria acknowledged by the academic/professional community, focusing on the ones practiced by the international scientific publications within the area of social sciences/exact sciences/humanities, with the purpose of evaluating the quality of the academic productions (oral and written) in the foreign language.</p> <p>C5 Elaborating written papers and original, oral presentations in the foreign language, with the purpose of applying the drafting principles and techniques which have been universally acknowledged within the academic environment, focusing on the main genres from within the specific field of study: essays (descriptive, comparative, argumentative etc.), research reports, scientific papers, book reviews/presentations, annotated bibliographies, conference presentations etc. This type of productions will be elaborated on the basis of the students' current needs from within their field of study.</p>
Transversal competences	<p>CT1 Completing individual tasks based on the writing models and with assistance from the teacher, materialized in the form of an individual portfolio. Applying the academic learning principles in the foreign language, fully governed by the principles of professional ethics.</p> <p>CT 2 Taking part in carrying out projects, as part of a pair or a team, focusing on becoming familiar with team roles in the academic working environment; the projects can take the form of presentations (conference presentations) on a topic specific to the field of study.</p> <p>CT3 Acknowledging the need for continuous development, focusing on consolidating and developing the basic knowledge related to the management of the individual learning process,</p>

	<p>regarding interindividual differences, specific to gender and culture, in processing information. The efficient use of certain intellectual operating tools and of learning resources/techniques/strategies: speed reading, reading sheets, taking notes, documentation, cognitive organizers.</p> <p>CT4 Acknowledging the need for continuous development focusing on using ICT tools to assist with personal and professional development management, by joining social media and professional networks, that support the development of the communication skills, specific for the foreign language.</p>
--	---

7. Course objectives (derived from the specific competences acquired)

7.1 General objective of the course	<ul style="list-style-type: none"> The students will be able to use the English language competently, at a B2 level, in their academic activity and in their future professional activity.
7.2 Specific objectives	<ol style="list-style-type: none"> Knowing and understanding thoroughly the contexts and roles, as well as the concepts, methods, the language/discourse specific to the different professional communication contexts in the academic environment in English, focusing on rhetoric, written and oral communication, the stages of the writing process and the products of academic writing, as well as on professional deontology. Using in-depth knowledge to explain and interpret the various types of written communication (types of scientific texts) and oral communication (scientific communications) as well as the conventions that govern the production of scientific texts in English in the context of BA studies and the extended professional community (both national and international). Transferring learning concepts/principles/methods in written text reception and in production, focusing on the stages of the writing process, organizing and developing ideas, text structure and the oral and written communication strategies specific to English specialized for the scientific discourse. Using the standard criteria acknowledged by the academic/professional community in order to assess the quality of academic productions both oral and written in English. Elaborating written papers and original, oral presentations applying the principles and techniques which have been universally acknowledged within the academic environment, focusing on the main genres from within the specific field of study. Completing the individual tasks independently/autonomously. Taking part in carrying out projects, as part of a pair or a team, focusing on becoming familiar with team roles in the academic working environment. Managing the individual learning process, identifying the learning needs, monitoring and reflecting on using the intellectual work tools efficiently together with the traditional learning resources/techniques/strategies and the ICT tools.

8. Contents

8.1 Lectures	Teaching methods	Remarks
Bibliography		

8.2 Seminars	Teaching methods	Remarks
1. Introduction; General presentation of the syllabus, course structure and examination. Placement test;	The inductive method; Brainstorming;	It assesses the language competence level of the students in order to distribute them into study groups.
2. Planning a Career in Science (1). Academia versus Industry: qualifications and job requirements; Writing a CV. Preparing for an interview;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
3. Planning a Career Science (2). Getting started in research; Investigating a fellowship; The research project summary: role and objectives;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
4. Organization of the research project summary: Paragraph structure and connectors; Writing a research project summary;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
5. Communicating with scientific communities: Methods and venues. Exploring elements of (in)formality in spoken/written scientific communication. The case of science forums: writing a science-related post;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
6. The critical review (1); How to read critically: Science news versus Scientific publishing; Exploration of the sections of a research paper: Case study - publications of the American Chemical Society (ACS) and the IRMD format;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT);	

	Working in micro-groups; The heuristic conversation; Brainstorming;	
7. The critical review (2) The publications of the American Chemical Society (ACS) and the IRMD format of a research paper; Organization of the critical review; Useful concepts for evaluating experimental results: validity, reliability, credibility; Writing the critical review;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
8 Reporting skills in the context of academic research and communication (1): Paraphrasing; Paraphrasing strategies; Elements of Academic integrity; How to avoid unintended plagiarism: the case of Turnitin;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
9. Reporting skills in the context of academic research and communication (2): Summarizing; Steps for writing efficient summaries; Reporting verbs and phrases;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
10. Reporting skills in the context of academic research and communication (3): Connecting and Synthetizing information; Synthetizing strategies; Using sources reliably: the case of Scifinder;	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
11. How to listen to a lecture: Exploration and practice of various note-taking systems (the table, the mind map, the Cornell method, the outline method);	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
12. Mediation for Science (1): Definition and practice of	The audio-lingual method;	

mediation; Keeping a laboratory notebook; Using the laboratory notebook to practice mediation;	The audio-visual method; The inductive method; The case study; Skimming / scanning; The communication method (CLT); Working in micro-groups; The heuristic conversation; Brainstorming;	
13. Mediation for Science (2) Mediating a text/ a concept/communication using pre-taught skills (summarising, paraphrasing, adapting language, synthetizing, note-taking etc.); Revision	The audio-lingual method; The audio-visual method; The inductive method; The case study; Skimming / scanning;	
14 Exam Listening Reading Writing	Practical activities	Exercises

9. Validating course contents based on the expectations of epistemic communities, professional associations and of potential employers related to the field of study.

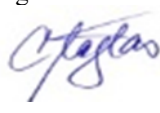

International and European language policies seek to address the growing needs of a labor and a scientifically internationalized research market, and as such, foreign languages for academic and specific purposes are represented throughout many university centers

- in the country (in vocational fields such as business, law, medicine, computer science, tourism, but also in the courses which make use of the scientific discourse in various fields – chemistry, physics, education sciences, social and communication sciences etc.). For reference, see the specific departments and the foreign language centers in Bucharest, Timișoara, Iași, Tîrgu-Mureș, Alba Iulia or Oradea.
- abroad (particularly regarding the academic learning competences and socio-professional communication), where all universities have centers that specialize in practical areas of the specialized discourse, playing an essential role in creating an instructional and academic culture. For instance, universities such as: Harvard, Washington, North Carolina, Southampton, Dartmouth, Essex, Leeds, Graz, Central European University, etc.

The content of the teaching activity can develop those skills and competences that are specific to academic learning and research activities, in the context of higher education internationalization.

10. Assessment (examination)

Type of activity	10.1 Assessment criteria	10.2 Assessment methods	10.3 Weight in the final grade
10.4 Lecture	•		
10.5 Seminar	<ul style="list-style-type: none"> • attendance and active participation in the practical course • timely and correct fulfillment of the assignments • acquisition of the vocabulary for specific purposes • accuracy, fluency and proper use of (spoken and written) English • the ability to use English efficiently in specific academic and professional contexts 	<ul style="list-style-type: none"> • written exam at the end of the semester • delivery of presentations throughout the semester 	75% 25%
10.6 Basic performance standard			
Organizational details, exceptional situation management:			
•
